Congratulations
on your
Blue Awards

Aanshi Bansal,
way to go above and beyond.

Thank you team for going beyond and volunteering to create Slackbot for Covid19. You spent few weeks including week ends in vetting out the architecture and designing the workflows and creating the initial bot in the sandbox and integrating it with application on eCP. Though this was put on hold, you were sportive and came forward to collaborate with other team and contribute for this cause in addition to your day to day work. Keep up the great work! You all are true asset for the organization.

Thank you for your immense contributions toward our continued collective success and for being a superb team, for having the courage and resilience you have had in dealing with these last many months and for being high caliber, collaborative and backing your colleagues in this moment.

Regards

Ruchika
